

DxP LSA for Windchill

Logistics Support Analysis

LSA - Logistics Support Analysis is a structured approach to increase efficiency of maintenance and reduce the cost of providing support, by preplanning all aspects of Integrated Logistics Support.

As part of its **S-Series** implementation initiative, **DxP Services** has developed an integrated and scalable **LSA solution** on the **PTC Windchill platform**. This proven solution is already deployed at many Aerospace & Defense customers and is proposed either as an extension of your PLM or as a separate installation.

S-Series standards-based solution

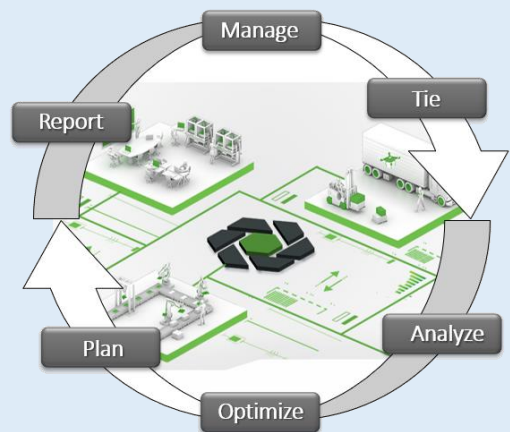

Break down the silos and expand **digital continuity** by having Engineering, IPC / IPL, LSA and illustrators' teams working on a central repository for Service and Engineering - all sharing the same 3D models and integrated Change Management.

DxP LSA for Windchill includes:

- LSA full Data Model
- Contract / Project / Location
- Zone element
- Additional Training Requirement
- Time Limit
- Multi-Identifier
- Task Document Resource
- Breakdown Element Structure Relationship
- Task Resource Relationship / Security Class
- Import / Report
- Export

ABOUT DxP SERVICES

DxP Services is an ITC Infotech specialized business unit focused on the implementation and adoption of PTC's industry-leading Windchill®, Product Lifecycle Management (PLM) software, as well as Cloud and Windchill+® SaaS offerings. Created through the acquisition of PTC's PLM implementation services division, DxP Services is the largest global PTC PLM ecosystem. The combination of PTC Heritage and ITC Infotech Power means that DxP Services is uniquely positioned to help accelerate customers' digital transformation initiatives.

Our portfolio of services augments value at every step of Modern Industrial Evolution; covering Consulting, Implementation, Deployment, and Migration. DxP Services' team of PLM Professionals are trusted advisors to our Customers during their Digital Transformation.
